Two New Books

INTEGRATIVE PSYCHOLOGY

An Eclectic Clinical System

FREDERICK C. THORNE, M.D., Ph.D.
Editor, Journal of Clinical Psychology

New: The first comprehensive system of integrative psychology reinterpreting the data and processes of psychology in terms of hierarchical levels of factors organizing integration.

Basic: The first broad spectrum eclectic system which truly provides a comprehensive rationale for psychodiagnosis and psychotherapy.

Significant: Integrative psychology for the first time provides a basis for understanding and dealing with psychological states. An important breakthrough in clinical thinking.

Necessary: Integrative psychology supplants the classic schools of psychology by reinterpreting their viewpoints into one comprehensive system.

Graduate Students . . . Please Note!

In 1945, less than five per cent of clinical psychologists designated themselves as eclectics. By 1965, more than fifty percent of APA Division 12 members classified themselves as eclectics. Such a trend can only mean that eclecticism is the coming thing of the future.
